

*“You are in a room
with two doors.”*

*“Step 3 has an error;
divide by 2, not 4.”*

*“Response A is
better than B.”*

Language as *grounding signal*
defines the task

Language as *deliberative feedback*
refines behavior at inference time

Language as *learning signal*
shapes parameters at training time

Agent: a single deployed system may consume all three signal kinds at once
